About Me

I have a lot of technical skills and experience that come from my years of working with technology. It all started with my early college years making money on the side developing websites. Then to the days of computing mathematical equations using MATLAB and Python. Finally moving to my most recent adventures developing a game using Unity3D and the .Net Framework.

However, those skills don't define me as a person. I am an "all-in" type of guy. My passion and determination for my work is on a massive level. I don't take long breaks. I don't binge watch Netflix. I don't go out and party. I get up and I work. Every day I take massive action towards my goals. I'm not perfect, and I do fail, but I don't let those failures stop me from pushing forward. I see failure as a sign to learn and adapt.

Therefore, if you are looking for an employee that wants to be part of a team, wants to learn, and always provides his best effort, then I am your man.

Education

Bachelor of Science from Western Illinois University   In 2012

Major area of study: Physics   Minor area of study: Mathematics

Graduated Summa Cum Laude with a 3.94 GPA

Experience

Web Technologies:

| HTML 5 | CSS 3 | JavaScript | PHP 7 | SQL | jQuery/GSAP |

Other web technologies include: Node.js, React, Angular, WordPress, Bootstrap, Foundation, as well as other frameworks.

I'm Highly Proficient With:
C# and .Net Framework
PHP
JavaScript

Adobe Products:
Photoshop
Illustrator
Premiere
After Effects

Recent Projects

Retro Unlocked

A website dedicated to retro games, programming, and gaming life built on WordPress framework.

Website: http://retrounlocked.com

Decide To Survive

A Windows top-down 2D story-led strategy video game built in Unity using C#

Gameplay video of DTS: http://bit.ly/2JevZeI

Work History

If you want a detailed work history, visit my Linkedin profile: https://www.linkedin.com/in/sean-crowe/

Title: GeekSquad Consulting Agent	**Years:** 2016 – present

As a consulting agent, I had three goals: dealing with client issues, helping repair computers, and selling Geek Squad Tech Support. When not repairing computers, my goal was to move clients from a negative emotional state to showing them a solution for their issues. In most cases, our tech support plan was the best option, and I would have to leverage their issues with the benefits of our plan to make a sale.

Title: Science Teacher	**Years:** 2012 – 2013, 2015 – 2016

I developed and taught courses in physical science and earth science. I created lessons that aligned with state standards, but also modified my lessons to meet individual student needs. I made sure my lessons were engaging to my students, and I worked to expand student thinking beyond memorization.

Title: Freelance Web Developer	**Years:** 2011 - 2016

As a self-employed freelancer I took on mostly web related jobs using technologies such as JavaScript (jQuery) and PHP. I did a few graphic design jobs during this time using Photoshop and Illustrator. I started it as a part-time side hustle during my college years but was able to get my name out in my local town.

Title: Web Developer	**Years:** 2008 - 2011

I was hired to design and maintain specific websites. I was tasked with creating a custom CMS that employees and volunteers could use to easily update any website. The CMS, dubbed "Web Editor", was used from 2008 until 2016. I worked with HTML, CSS, JavaScript, jQuery, PHP 4, and SQL.
